

# Detartrine

Silica dental pastes for scaling and polishing dental surfaces and removing even the most stubborn stains.

# Detartrine

Ready to use Dental abrasive paste for cleaning & polishing

**DETARTRINE** is pink paste, with a pleasant taste. It has mechanical abrasive action due to the presence of silica, which makes it possible to complete the removal of dental tartar, after using an ultrasonic or hand scaler, without causing erosion of dental enamel.

### Features

- ◆ Polishing after scaling and root planning.
- ◆ Mechanical abrasive action due to the presence of silica.
- ◆ Pleasant taste and feeling of freshness thanks to the essential oils.
- ◆ Detartrine contains Zircon powder for an improved efficiency against difficulty to remove stains\*

### Clinical Benefit

- ◆ Prevention of caries and periodontal diseases (prophylaxis).
- ◆ Prevention of soft tissue injuries
- ◆ Aesthetic enhancement

### Clinical Performance

- ◆ Removal of dental plaque
- ◆ Reduction of extrinsic stains
- ◆ Smoothing of tooth and restorative material surfaces

Gentle but effective stain removal

Available with fine zirconium particles

Essential oils for a fresh taste
